

MAGNETIC MINIRAIL

Introducing our new addition: the Mini Magnetic Rail System. Available in black and white, this rail is 2 cm wide and can be ordered in custom lengths. The power supply for the rail is also magnetic, as shown in the image beside.

APPLICABILITY

Our Magnetic Minirail are ideal for illuminating display cases in jewelry stores, for example. They would also be a great fit for museums. The small spotlights are perfectly suited for precisely highlighting small objects.

1W SPOTS

Available in 3000K and 4000K, this mini trackspot features a compact base/foot measuring only 30 by 10mm. The cylindrical shape is 22mm in length with a diameter of just 16mm. It is also available in 12V and 24V options, providing a luminous flux of 110 lumens.

3W SPOTS (WITH ADJUSTABLE BEAM ANGLE)

The 3-watt version is also available in 3000K and 4000K. This mini trackspot features a compact base/foot measuring only 30 by 10mm. The cylindrical shape is 42mm long with a diameter of just 22mm. It is also available in 12V and 24V options, providing a luminous flux of 200 lumens. What makes this trackspot special is its adjustable beam angle, ranging from 6 to 60 degrees.

MINI LED BARS

This rail is also compatible with magnetic mini bars. They are available in 200mm and 300mm lengths, with Kelvin options of 3000K and 4000K. The smaller variant has a luminous flux of 400 lumens, while the 300mm version offers 600 lumens. The smaller version has a wattage of 4, while the larger one has a wattage of 6. Both variants have a beam angle of 60 degrees.
