

Smart Lighting Solutions

SMART LIGHTING SOLUTIONS

QLA is becoming more and more familiar to the world. The development in the field of LED lighting is going at a very fast pace. LED lighting is not only more economical, but also becomes more intelligent.

LED lighting already saves a lot of energy, in combination with a smart lighting solutions system you can get more efficiency out of the lighting and save more on energy costs. Through the management system you now have control over the lighting and it is possible to make various scenes that are energy-saving. This reduces the consumption of the lighting, saving you more energy and money.

LED lighting can be intelligent in various ways, you can link the lighting to a node or to a gateway and this allows you to control lighting all over the world. Through these hardware applications you can monitor what happens to your lighting. Keep an eye on energy consumption, you can even see which lamp is still on. It is even possible to control lighting all over the world!

PROJECTS

We from QLA have been fortunate to work on many high-profile projects since 2006, from small shops to large factories overseas. We started out with small projects in Europe, but thanks to our development and growing experience you will find our LED Lighting all over the globe. Think about big store chains, complete train stations, cruise ships, buildings, offices, factories, restaurants, festivals and the biggest art fairs in the world. Because of our large range of different projects we have a complete range of LED products, from industrial products to retail lighting, everything you need to complete a store with professional lighting, including displays for advertisement purposes. If you want to go extra big on advertisement. We also have LED Screens that can be as big as you want!

This doesn't mean we don't do small projects, as we like to say no project's too small or too big. Every kind of project is welcome. We always have a solution for every situation. We are known for our custom made projects. Good quality products & excellent service.
